PLATFORM ARCHITECTURE & DESIGN SYSTEM

Robotshow.id

Interactive Digital Platform, Editorial Craft, 3D Kinematic Simulation, and AgiBot Humanoid Rental Showcase.

ARMADA: AgiBot X2 Ultra, A2 Ultra, A2 Lite, Robodog

STACK: React 19 · Vite 8 · Three.js · GSAP Suite

VERSION: 2.0 Production Ready

PURPOSE & POSITIONING

Humanoid Robot Talents for Next-Gen Events

Robotshow.id is the official digital portal for commercial humanoid robot rentals in Indonesia, engineered specifically for **product launches, international expos, stage choreographies, mall activations, and VIP hospitality**.

Far beyond a generic corporate brochure, the platform delivers an international agency-grade interactive experience that establishes immediate technological credibility for high-profile enterprise clients.

- → **Certified Field Operators:** Professional handlers accompany every robot deployed on-site.
- → **Custom Musical Choreography:** Synchronization with client brand jingles, dances, or stage tracks.
- → **Nationwide Coverage:** Full turnkey logistics operating out of Jakarta, Surabaya, Bali, and across Indonesia.

01

Photo Studio Hero

Tactile interactive photoshoot experience with real-time cursor tracking and physical draggable prints.

02

Real-Scale Roster

Anatomically accurate humanoid lineup featuring 3D tilting comp cards with flippable datasheets.

03

Cinematic Teaser

Curated 16:9 contact sheet with dynamic grease-pencil framing and zero-lag full HD video transitions.

04

3D Casting Lab

Independent real-time Three.js URDF joint kinematics and facial LED expression simulator.

REFINED EDITORIAL DIRECTION

Contemporary Editorial & Swiss Typographic Rigor

Rejecting cliché dark-mode cyberpunk tropes and abrasive neon colors, the design adopts a **prestigious editorial aesthetic** inspired by high-end design houses like Lusion—balancing archival paper surfaces with deep naval tones.

Deep Navy	Archival Paper	Studio Blue	Electric Sky
#0B1533	#F4F3EF	#153896	#38BDF8

Every color is balanced for extreme readability, WCAG AA compliance, and refined optical contrast on both desktop monitors and OLED mobile displays.

DISPLAY HEADINGS

Bodoni Moda & Playfair

Delivers architectural elegance and authoritative presence akin to an international fashion magazine masthead.

BODY & UI INTERFACE

Plus Jakarta Sans & Switzer

Clean geometric sans-serif ensuring flawless legibility across compact devices and varied viewing distances.

TECHNICAL METRICS

IBM Plex Mono

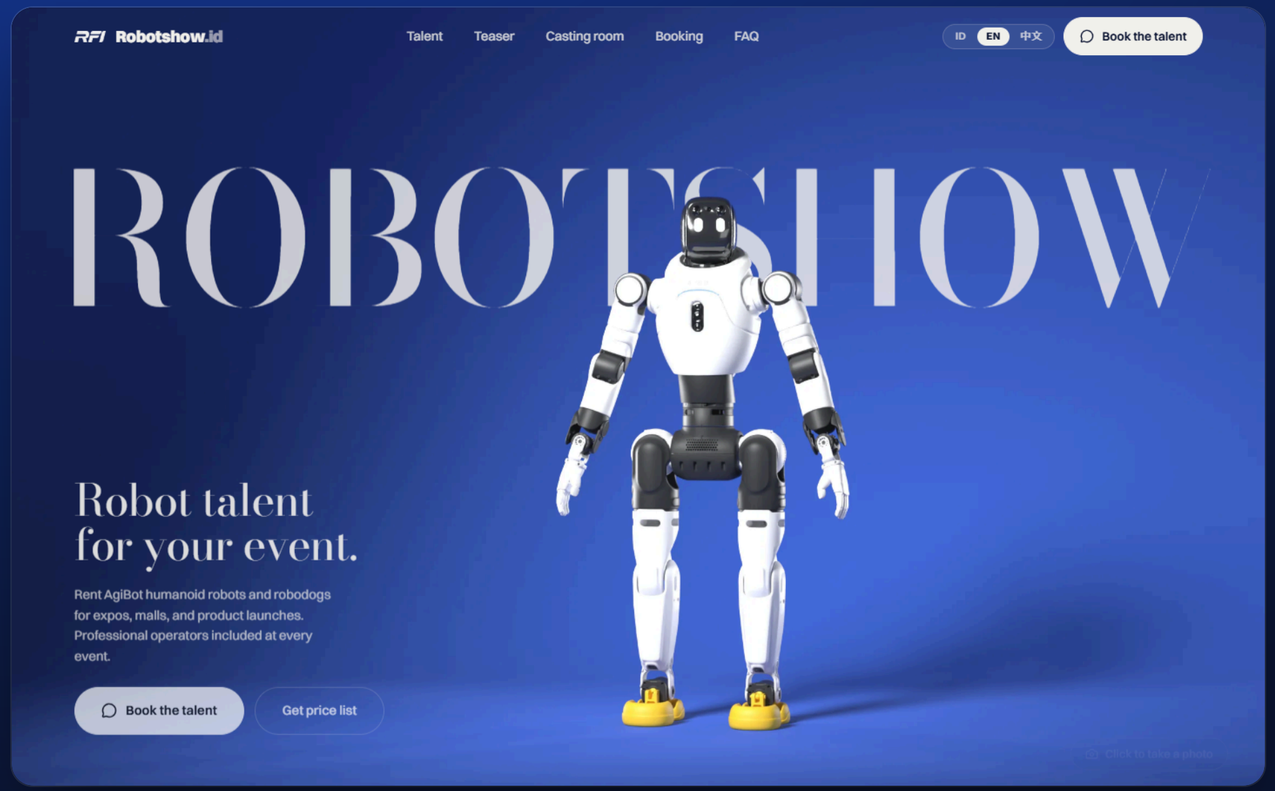

Precise monospace voice dedicated to joint degrees of freedom (DoF), torque metrics, dates, and call sheet labels.

LANDING EXPERIENCE

Hero: Interactive Photo-Shoot Studio

Presents the AgiBot X2 Ultra humanoid robot inside a simulated photography studio. Every frame is pre-rendered via Cycles from official factory CAD models.

- → **Pointer Head Tracking:** The robot head fluidly follows visitor mouse coordinates in real time.
- → **WCAG-Compliant Studio Flash:** Clicks trigger a controlled studio flash pulse (strictly safety-capped under 2 flashes/sec) as the robot shifts poses.
- → **Physics-Driven Draggable Prints:** Captured photographs land in a polaroid pile that visitors can fling around using GSAP Inertia physics.
- → **Seamless Direct WhatsApp CTA:** Instant call-to-action routing event inquiries directly to marketing handlers.

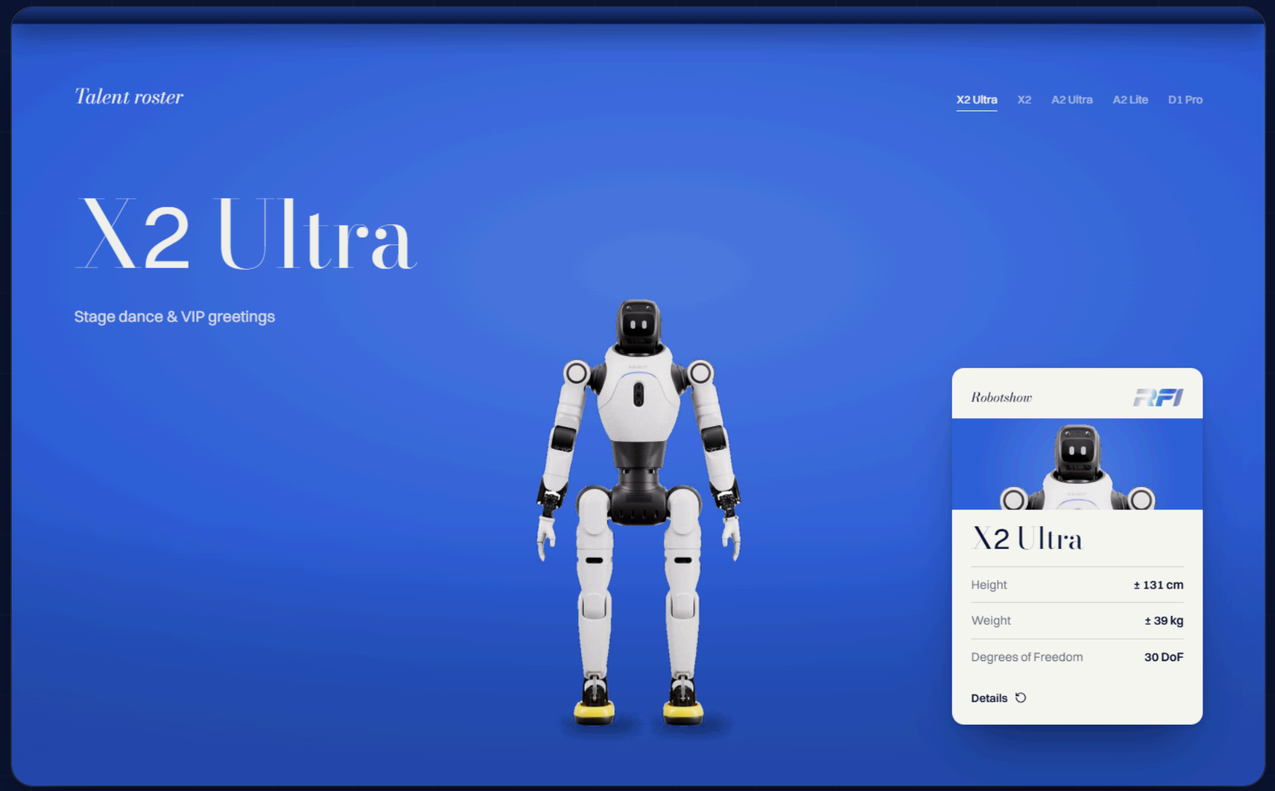

FLEET CATALOG

Talent Roster: True Scale & Comp Cards

Showcases robots as professional performance models against seamless paper backdrops that dynamically unroll on vertical scroll.

- → **True Anatomical Proportions:** Illustrates authentic physical heights visually (X2 Ultra at 131 cm vs. adult-scale A2 Series at 169 cm).
- → **Interactive 3D Comp Cards:** Model cards tilt with mouse movement and feature responsive foil reflections on the RFI crest.
- → **Dual-Sided Card Flip:** Flips to reveal detailed engineering specifications (DoF, joint torque, battery duration) and booking triggers.
- → **Instant Filter Tabs:** Quick-navigation buttons allowing instant switching between individual humanoid units.

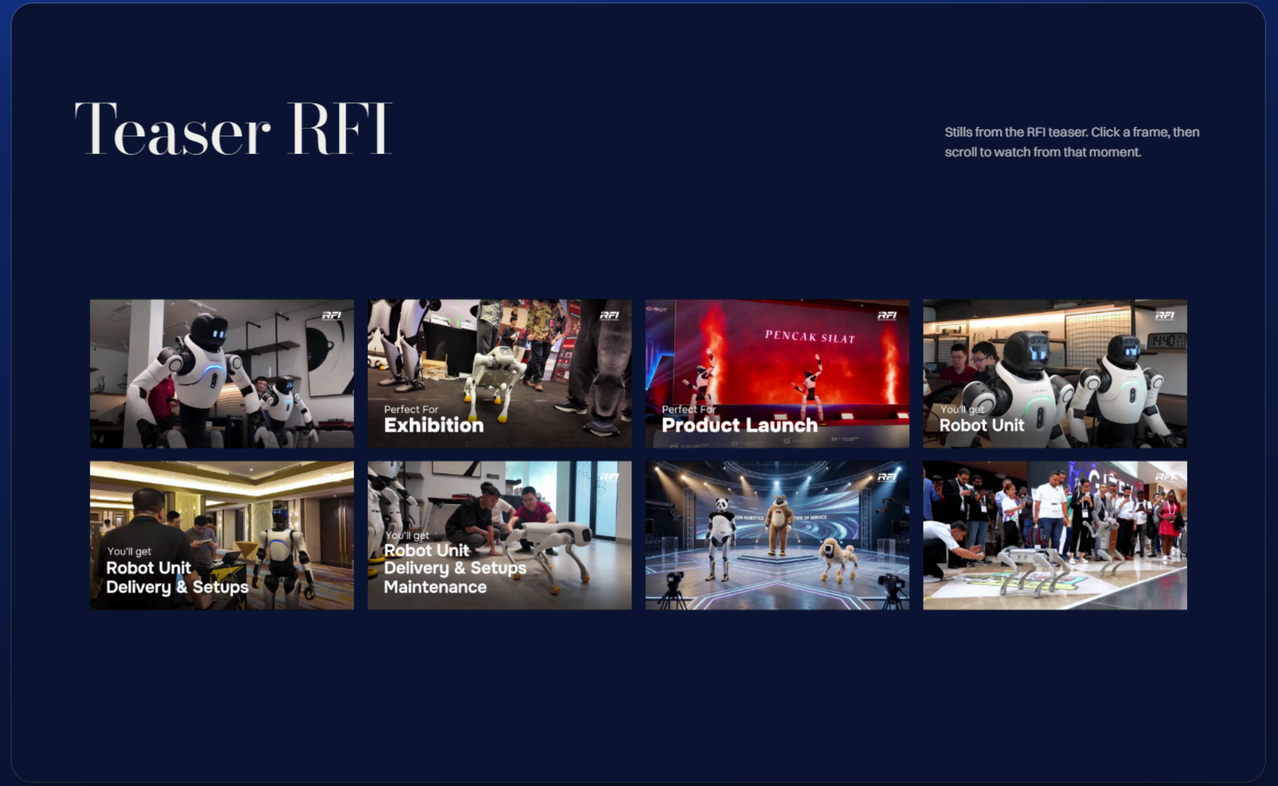

EVENT SHOWCASE

Teaser: 16:9 Cinematic Video Experience

Documents genuine live stage spectacles—including synchronized Pencak Silat martial arts, mall grand openings, and corporate reveals.

- → **Curated 8-Frame Contact Sheet:** High-resolution 16:9 widescreen stills capturing signature performance highlights.
- → **Dynamic Grease Pencil Loop:** An animated hand-drawn white circle marking the visitor's selected snapshot.
- → **Zero-Lag 1:1 Video Zoom:** On scroll, the encircled frame expands seamlessly into a centered 1080p Full HD video playing from the exact second.
- → **Integrated Audio Toggle:** Direct mute/unmute control accessible at the bottom-right corner.

BOOKING WORKFLOW

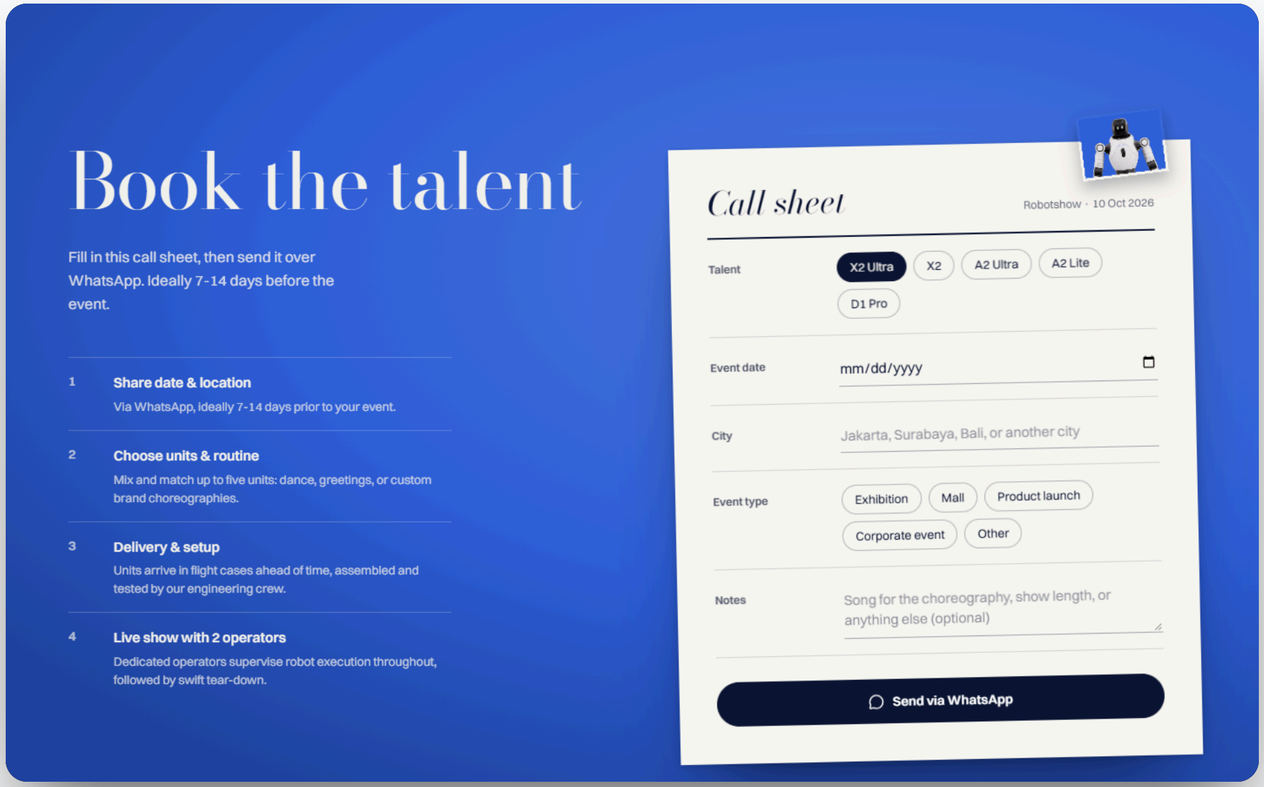

Call Sheet: Production-Grade Booking Flow

Re-imagines standard web forms into an authentic **Production Call Sheet**, streamlining event inquiries into immediate WhatsApp conversions.

→ **Visitor Photo Pinning:** Polaroids taken by the visitor during their Hero studio photoshoot automatically attach to the booking sheet.

→ **Structured Parameters:** Client selects talent model, event dates, operational hub (Jakarta, Surabaya, Bali, etc.), and event format.

→ **Automated Message Encoding:** Converts user inputs into a structured, professional WhatsApp message pre-filled for one-tap sending.

THREE.JS HARDWARE SIMULATOR

3D Casting Lab Simulator (/casting/)

A standalone 3D sandbox allowing enterprise clients to inspect joint articulation, kinematic limits, and expressions of the AgiBot X2 Ultra prior to booking.

- → **URDF Real Joint Kinematics:** Interactive drag manipulation across the robot's head, torso, upper arms, wrists, and knees.
- → **Choreography Action Presets:** Instant buttons for signature stage routines (wave, cheer, martial arts stance, point).
- → **Facial LED Expressions & Branding:** Live toggle of facial LED moods (friendly, alert, neutral) and chest logo decals.
- → **Decoupled Performance Architecture:** Isolated route ensuring zero bundle overhead or frame drops on the main landing page.

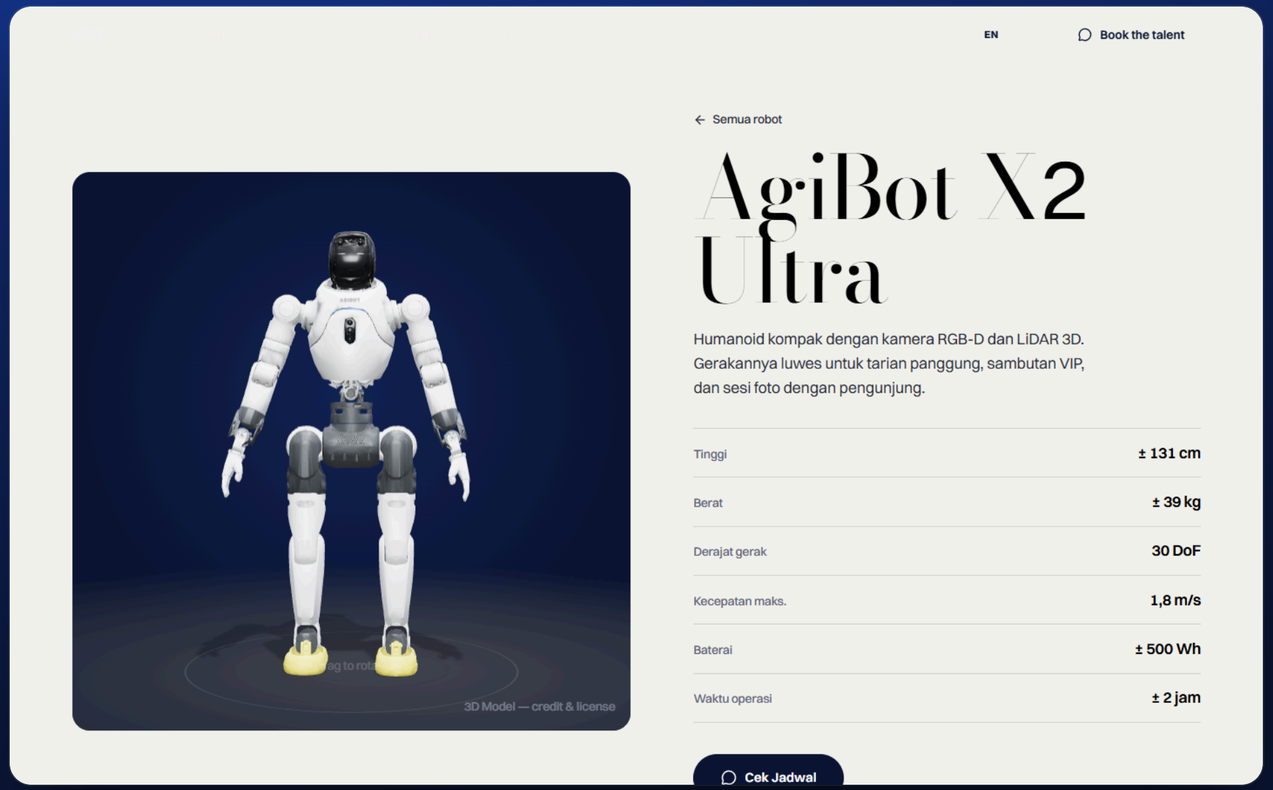

STATIC MULTI-PAGE GENERATION

Dedicated Robot Pages (/robot/:id/)

Every rentable unit features an independent, static landing page (e.g. `/robot/x2-ultra/`, `/robot/a2-lite/`) optimized for search engines and social link previews.

- → **Focused 3D Model Viewer:** Dedicated 360–degree orbital inspection of high-fidelity compressed GLB models.
- → **Animated Spec Counters:** Hardware telemetry (degrees of freedom, weight, battery capacity, walking speed) count up upon page entry.
- → **Tailored Stage S сценarios:** Curated lists of recommended acts suited to each model's mechanical footprint.
- → **Custom OpenGraph Previews:** Unique social banner images and meta descriptions generated for crisp WhatsApp message previews.

EN · ID · ZH

Trilingual Localization

Seamless instant language switching across the entire platform:

→ **English (EN):** Primary standard for multinational corporate clients.

→ **Bahasa Indonesia (ID):** Native localization for domestic markets.

→ **Simplified Chinese (ZH):** Direct alignment with AgiBot principals and international partners.

FAQ

Educational Accordion

Proactively resolves critical operational queries before client outreach:

→ Optimal booking lead times (7–14 days in advance).

→ Audience & children safety protocols during live shows.

→ Brand song synchronization and rehearsals.

→ Hot-swappable battery management on-site.

→ Flight-case freight logistics across Indonesia.

A11y

Inclusive Accessibility

Engineered for diverse devices and accessibility requirements:

→ **Reduced Motion Support:** Disables intensive motion for users with vestibular sensitivities.

→ **Keyboard & Screen Reader Skip Links:** Direct navigation jumping to main content.

→ **Smart Sticky Header:** Context-aware navigation that hides on scroll down and reveals on scroll up.

CORE FOUNDATION

React 19 & Vite 8

Ultra-modern component tree with sub-second HMR compilation, pure ES modules, and dynamic route chunking.

MOTION SUITE

GSAP & Lenis

GSAP ScrollTrigger, Draggable physics, and Lenis 1.3 delivering silky smooth 120Hz display refresh synchronization.

3D PIPELINE

Three.js & Meshopt

WebGL2 shading, Meshopt compression decoders, orbital camera controls, and factory URDF kinematics parsing.

DEPLOYMENT & QA

Oxlint & Multi-Page SSG

0 Lint errors, pre-rendered static HTML routes for SEO and WhatsApp previews, and optimized WebP media delivery.

Performance Benchmark: Sustained 60 FPS Desktop · Sub-Second Mobile Load Times · Zero Cumulative Layout Shift

STATUS: 100% PRODUCTION READY

VALUE PROPOSITION

Setting a New Digital Benchmark for Robotics in Indonesia

Robotshow.id unites world-class AgiBot humanoid engineering with an internationally acclaimed interactive digital showcase—instilling immediate enterprise confidence in Robot Future Indonesia's capabilities.

Institutional Trust

Editorial aesthetics position RFI as the undisputed premier distributor of AgiBot robotics.

Frictionless Conversion

Seamless journey from interactive play and talent exploration to WhatsApp booking in under 60 seconds.

Executive Ready

This documentation is structured for immediate presentation to C-level executives, partners, and event organizers.
